

UNDERGRADUATE

Welcome to the Undergraduate Course Catalog.

While navigating our catalog and exploring course and program offerings, please note that our catalog is designed to display program requirements for the incoming class of students or those who have formally changed their catalog year to the most recent year. In other words, students pursuing the 2025-2026 academic year requirements should utilize this catalog edition for their program requirements. Students pursuing other academic year requirements should reference that corresponding year's catalog. Please see the below definitions for additional information.

Catalog Year: the specific graduation requirements a student is pursuing. The catalog year can be updated for a student in consultation with their academic advisor and with the approval of both the academic dean and Office of the University Registrar within the confines of policy. A student's catalog year may be altered by the university due to a period of non-enrollment.

Catalog Rights: A student has the right to pursue the curriculum associated with the year they begin attending Virginia Tech or a subsequent year as policy allows. Students who defer their attendance forfeit their initial catalog rights.
